7
WONDERS
of Natural Curly
HAIR

#1

Bio-Responsive

Curly Hair is so amazing that your DNA has designed Afro textures to be in harmony with your environment. When straightened curly hair is only trying to bio-respond to its ecosystem, aligning itself with the natural elements in the air.

#2

Electric-Magnetic

As stated before curly hair is very connected to the environment. Curly hair will not stand up if you place your hand on an electric socket or electrical dome like straight hair will. Why? Afro textures are already electric-magnetic. Afro textures are attracted to higher electrical particles thus creating stronger magnetic fields.

The implication are further explained my Intro to Afro Cosmetology course.

#3

Coil Count

Afro hair has been seen as negative and was often scorned. But it is coiled for a reason. Did you know, that the more your hair coiled the more energy is in your magnetic field? Texture is quantified and measure in how many coil loops there are in a single hair strand.

#4

Tropism

Afro curly hair is like magic. It is constantly communicating with the ecosystem and biospheres. This is the reason Afro textures will never grow towards the body or downward. Curly hair obeys nature growing in the direction of the force of energy.

#5

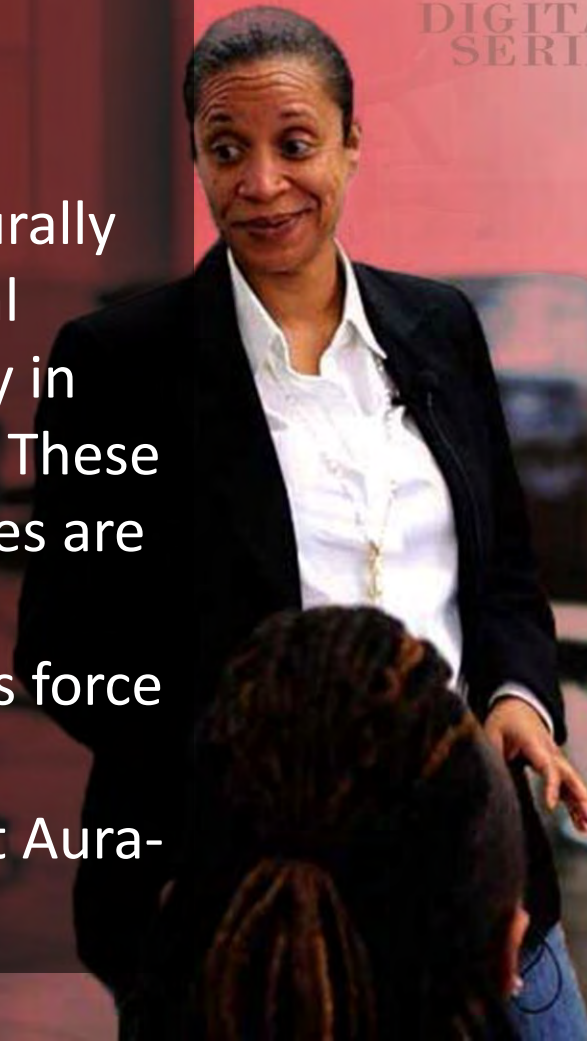

Self-Cleaning

Curly hair being bio-kinetic means that Afro textures are naturally aligned to natural forces like energy in the atmosphere. These abundant energies are what prolongs shampooing. This force keeps curly hair cleaner, we call it Aura-Hygiene.

#6

Metamorphic

Have you ever wondered why Afro textured babies hair changes? It's because Black babies are born with recessive hair first when it comes out of the mother's womb. As we mature, our hair goes through its DNA instructions and phases to become Dominant.

#7

Geometric

Afro textures are completely geometric. Geometry is the best part of curly hair. When you take a single strand, its multiple parts are all mathematically patterns of the geomancy of nature. Afro textured strands are symmetrically perfect at every twist and coil.

The Anatomy of the AFRO AFRO-GEOMETRY

The Anatomy of the Afro is more than explaining the cultural meaning of it, while adorning its aesthetic beauty is satisfying and its size, a wonder to behold. The Afro can be appreciated in principle. Its geometry, its evocative fundamentals, scientific nature and its Power.

Dr. Willie Morrow has given us our map back to orientation center. "He says The Afro is our power" in our multiverse of afro science where styling ethnic brands and beauty product making are systemic, black spirits follow a history of innovation to its logical origin: The Afro and its Power.

HEIGHT
The Afro grows toward the sun, most in equatorial latitudes.

WEIGHT
The Afro defies gravity, length is not a part of weight, weight is where it hangs from.

VOLUME
As the Afro grows, it begins to take more volume, the Afro effect.

MASS
The Afro grows with growth, as it increases, the Afro mass grows.

3.1415926535897932384626433832795028841971693993751058209749445923078164062862089986280348253421170679821480865132823066470948296466606718158212891560141844886951848843210882620616888967007257660270337201

When the golden ratio is applied to the Afro, it creates a perfect square, and when applied to the Afro, it creates a perfect circle. The golden ratio is the most beautiful proportion in nature.

The Golden Spiral is a geometric pattern of whorls that grows in size as it goes around. It is found in many natural forms, including the Afro.

When the Afro is measured, it grows in a circle. It has a circumference that is 3.14159 times its diameter. This is a mathematical constant that is found in many natural forms.

The Afro is a triangle. It has a base that is 1.618 times its height. This is a mathematical constant that is found in many natural forms.

The Afro is a DNA helix. It has a length that is 3.4 times its width. This is a mathematical constant that is found in many natural forms.
